

## Homebase Swindon

Electrical demand reduced by 42%.

Equates to an average annual saving of 211,728 kWhr/year, a saving of £20,000 at typical electricity cost of 9.6p/kWhr.

### Project Description

- ❑ Identification of essential equipment and services to ensure that only these are connected during non trading hours.
- ❑ Tight control of temperature set points and time clocks.
- ❑ Application of 'free cooling' techniques where appropriate.
- ❑ Optimisation of controls to ensure most efficient store operation.

### Company Profile

Established in 1992 to design and manufacture industrial control panels and systems, Severn Controls is now one of the UK's leading integrated controls specialists offering a comprehensive service that includes design, manufacture, installation, commissioning and ongoing maintenance of commercial and industrial controls.

With over 1000 commercial buildings managed via their 'Energy Bureau', Severn Controls are uniquely positioned to help clients to meet and maintain their energy reduction targets.
